Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL, Kotlin, R

Frameworks & Libraries: React, Next, Vue, Flask, Node.js, Express, Tailwind, Bootstrap, NumPy, Pandas, Scikit-Learn, Matplotlib

AI & Data: Retrieval Augmented Generation (RAG), Vector Search, Embeddings

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Neo4j

Cloud & Tools: AWS, Docker, Git/GitHub, Agile, Scrum

Experience

The Debate Network

Sep 2025 – Dec 2025

Full Stack Developer

Industry Project, BCIT CST Program

- Built a responsive full stack debate platform using **Vue.js**, **Tailwind CSS**, and **Node.js**
- Designed RESTful APIs and implemented an advanced rating system for managing users, debates, and ratings

Gigsup

May 2025 – Jun 2025

Full Stack Developer

Industry Project, BCIT CST Program

- Built responsive and interactive **React** components styled with **Tailwind CSS**, implementing dynamic routing and state management for a smooth user experience
- Developed and integrated RESTful **Flask** APIs to enable seamless communication between frontend/backend

IOTO

Jun 2024 – Dec 2024

Full Stack Developer

Co-op

- Automated large scale political data collection using **BeautifulSoup** and **Selenium**, ingesting data into **Neo4j**
- Built interactive data visualizations with **Vue.js** and developed **Flask** REST APIs for analytics workflows
- Collaborated in an **Agile** environment through sprint reviews and code integration

Projects

NBAdle | Python, Flask, React, PostgreSQL, FAISS, RAG

Aug 2024 – Dec 2025

- Designed and developed NBAdle, a full stack basketball guessing game inspired by Wordle and LoLdle
- Built a retrieval augmented generation (RAG) chatbot that answers natural language NBA queries using vector search over player and team data
- Implemented embedding pipelines with FAISS to retrieve relevant context and generate accurate, data grounded responses
- Scraped, cleaned, and structured NBA datasets to power gameplay logic, analytics, and chatbot retrieval
- Developed a React frontend and Flask backend integrated with PostgreSQL for dynamic gameplay and data driven features

BCIT RAG Chatbot | Python, LLM, LangChain, RAG, BeautifulSoup

Nov 2025 – Dec 2025

- Developed a RAG chatbot that answers BCIT questions, providing concise, source-cited responses on programs, tuition, and campus info
- Implemented semantic search to embed scraped HTML and PDF data from BCIT/BCITSA
- Built a LangChain pipeline that retrieves relevant document chunks and generates grounded answers using an LLM

QuizGen | Next, TypeScript, Node, Express, PostgreSQL, Hugging Face LLM

Oct 2025 – Dec 2025

- Developed an AI powered quiz platform using Qwen3 4B Instruct for generating multiple choice quizzes with explanations
- Implemented Next/TypeScript frontend and NodeExpress + PostgreSQL backend to handle quiz generation, history, and user interactions

Education

British Columbia Institute of Technology

Sep 2023 – Dec 2025

Computer System Technology Diploma (ML and AI Option)

Burnaby, BC

University of British Columbia

Sep 2017 – May 2023

BA Psychology Major, Statistics Minor

Vancouver, BC
